CURRICULUM VITAE

Georges Miguel MOUKOKO EKAMBI

AI Engineer & Data Scientist

Explainable AI · Edge AI · Full-stack · Founder of LIDIA Lab · MSc Data Science & AI, ENSPD Douala

> Final-year MSc Data Science & AI engineer. I design explainable models and ship them to production. My two research tracks are explainable AI (Kolmogorov-Arnold networks, SHAP, Grad-CAM) and edge AI (quantised models that run offline). Founder of LIDIA, a B2B sovereign-AI startup focused on African languages and intranet deployment, and software development instructor at ENSPD.

01 EXPERIENCE

Founder & AI Lead

2025 · present

LIDIA, sovereign AI startup · Douala

- Hybrid RAG architecture (semantic + BM25 retrieval) and multimodal OCR pipelines for closed intranet deployment.
- Products: AgroSense (offline crop diagnosis), Nexus (multi-agent marketing), Meerkat (agentic pentesting), PharmaCon, Lead's AI (sovereign LLM).
- Integration of open-source LLMs adapted to African languages and contexts.

Data Scientist Intern

2026

BEAC (Bank of Central African States) · Balance of Payments

- Anomaly detection tool for CEMAC monetary aggregates: LOF*, Transformer + BiLSTM + VAE, conformal prediction, SHAP explanations; Dash / PyQt6 app.
- Analysis of oil export revenue retention (IMF data): typology, clustering, LaTeX report.

Software developer

2026 · present

NexCQISolutions · Aura CareOS

- Security module of an OpenEMR-based electronic medical record: MFA, access control, tamper-evident audit log, PHPUnit tests.

Software engineering intern

07/2025 · 01/2026

ESOAF · Yaoundé

- Full-stack modules for enterprise data anonymisation.
- Integrated computer vision models into industrial workflows; processing pipelines for decision support.

MKO · DATA · IA · SOFTWARE

SKILLS

AI & Data Science
Python, R, PyTorch, TensorFlow / TFLite, scikit-learn, XGBoost, SHAP, Optuna, séries temporelles / time series, RL

Explainable & edge AI
KAN, Grad-CAM, prédiction conforme / conformal prediction, quantification INT8, YOLOv8, EfficientNet, offline-first

Generative AI & agents
RAG hybride (BM25 + dense, RRF), GraphRAG, LangGraph, Qdrant, Ollama, OCR multimodal, GAN, VAE

Engineering
C# / ASP.NET Core 8, FastAPI, Node.js, React, TypeScript, Flutter, Rust, PHP, Clean Architecture, microservices

Data & Ops
PostgreSQL / PostGIS, SQL Server, Redis, Kafka, Hadoop, Docker, AWS EC2 / S3, GitHub Actions, Power BI, Plotly Dash

SCAN ME

PORTFOLIO LINKEDIN GITHUB

01 EXPERIENCE

Freelance full-stack developer — alongside
Clients in Cameroon

- WinPlus (live learning platform with the WinAI assistant), multi-tenant business email, HomeGamesFive, SISIA SARL; .NET 8, React, Flutter, AWS.

Intern — 2022 · 2023 · 2024
CAMRAIL (railways) · Douala

- Three summer internships: supported railway traffic management teams, wrote technical reports on performance indicators, contributed to transit-time optimisation projects.

02 EDUCATION

MSc Data Science & AI (SDIA) — ongoing
ENSPD, University of Douala · thesis: Mobile Money fraud detection with KANs

BSc Data Science & AI — 2024
ENSPD · with honours

Baccalaureate, series C (maths & physics) — 2021
Collège Adventiste de Yaoundé · with honours

03 KEY PROJECTS

MKAN · MoMTSim
Thesis · explainable AI
Mobile Money fraud detection with a recurrent KAN, multi-agent simulator, explained real-time scoring (Kafka, Redis, Dash).

KALATI-RAG
CAMRAIL · sovereign RAG
On-premise document assistant: hybrid retrieval, GraphRAG, faithfulness gate, Qwen3 via Ollama.

AgroSense
LIDIA · edge AI
Offline photo-based crop diagnosis (TFLite), Grad-CAM, DBSCAN surveillance; Flutter, .NET, FastAPI.

PREDOC
CAMRAIL · forecasting
Block occupation time after a derailment: quantile XGBoost, calibrated interval, SHAP.

Nexus AI
LIDIA · multi-agent
Nine marketing agents orchestrated with LangGraph and human approval, local or cloud LLMs.

DermAI
Health · edge AI
Tropical skin diseases: EfficientNet-B2, offline TFLite inference in Flutter, Grad-CAM.
